ABOUT ME

Dedicated Computer Science student with a keen interest in creating innovative solutions and exploring emerging technologies. Committed to continuous improvement, collaborative learning, and applying academic knowledge to real-world challenges. Looking for opportunities to learn, contribute, and grow in a professional environment

EDUCATION

Bachelor of Technology in Computer Science and Engineering(2024-2028)
CGPA: 9.4/10

Higher Secondary Education
Percentage: 79%

Secondary Education
Percentage: 74.4%

SKILLS

TECHNICAL SKILLS

- Programming Languages: Java, PHP, JavaScript
- Web Technologies: HTML, CSS , React.js
- Database: MySQL , MongoDB
- Core Concepts: Data Structures & Algorithms, OOP, DBMS, Computer Networks
- Tools & Platforms: Git, GitHub, Visual Studio Code, XAMPP

SOFT SKILLS

Problem Solving , Communication , Teamwork , Adaptability , Quick Learning

PROJECTS

AasPass | Group Project

- Collaborated in the development of a quick-commerce platform that connects customers with nearby local shops for faster product delivery.
- Contributed to designing a scalable solution that eliminates warehouse dependency and supports local businesses through digital commerce.
- Assisted in implementing location-based product discovery and multi-store product availability features.
- Worked in a team environment to develop and present the project during QHackathon 2026.
- Helped integrate modern web technologies and database solutions to support efficient data management and user interactions.

Technologies Used:

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Google Maps API, Git, GitHub

Library Management System

- Developed a full-stack web application for managing library operations, including book cataloging, issue requests, and return management.
- Implemented secure authentication and role-based access for administrators and users.
- Designed an interactive user interface for searching, borrowing, and tracking books.
- Integrated MySQL database for efficient storage and retrieval of library records.
- Streamlined library workflows through automated issue, return, and inventory management processes.

Technologies Used: React.js, PHP, MySQL, CSS

ACHIEVEMENTS

- Participated in QHackathon 2026 organized by Quantum University, Roorkee as a member of Team Trailblazers.
- Collaborated in designing and presenting "AasPass", an innovative quick-commerce solution focused on connecting customers with nearby local shops.
- Worked in a team environment to develop and showcase a technology-driven solution addressing real-world commerce and delivery challenges
